DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Timothy (GB 121911) in view of Busbey (4,310,418).

Timothy discloses, in drawing, pages 1 and 3, a utensil having lid, a handle defining an opening where a lever goes through, the level having a grip end and a clamp end substantially as claimed.

Timothy does not disclose the utensil having a pouring spout.

Busbey teaches a utensil having a pouring spout.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Timothy utensil having a pouring spout, as taught by Busbey, in order to facility of pouring the liquid from the utensil.

The utensil of Timothy in view of Busbey is capable of performing the step as claimed.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ostrowsky et al. (3,5188,731) in view of Unger et al. (3,809,285) and further in view of Obermann (245,500)

Art Unit: 3754

Ostrowsky discloses, in figs. 1, 2 and 5, a utensil having lid, a handle defining an opening where a lever goes through, the level having a grip end and a clamp end.

Ostrowky et al. do not disclose the utensil having a pouring spout, and the level being rotatably secured to the handle body by axial attached to side arms of the handle body.

Umger et al. teach a utensil having a handle defining an opening where a lever goes through, the level having a grip end and a clamp end, and the level being rotatably secured to the handle body by axial attached to side arms of the handle body.

Obermann teaches a utensil having a pouring spout.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Ostrowsky utensil having a pouring spout, as taught by Busbey, and having the handle with a lever being rotatably secured to the handle body by axial attached to side arms of the handle body, as taught by Unger et al., in order to facility of pouring the liquid from the utensil and facilitate of using for locking and unlocking of the level.

The utensil of Ostrowsky et al. in view of Unger e al. and Obermann is capable of performing the step as claimed.
